- [Stain](#)
- [Acrylic paint](#)
- [Paint brushes](#)
- [Painter's tape](#)
- [Vinyl](#)
- [Cutting Machine](#)
- [Wired-edge ribbon](#)
- [Adhesive](#)

INSTRUCTIONS

1. Protect your surface with thick paper or plastic.
2. Sand your sign with your sanding block.
3. Remove dust with a tack cloth or other clean, dry cloth.
4. Read the instructions on your stain to see how to prep and apply the stain. Some stains work differently than others. Also make note of drying time.
5. Apply your stain with a cloth or a brush. A washcloth works great! Let it dry according to the instructions on the can.
6. Apply a second coat if desired and let dry for the appropriate time. A few hours or overnight is ideal.
7. Apply painter's tape to section off where you want to paint.
8. Start painting with acrylic paint in that section, painting with long, even strokes, going with the grain. Let dry for 1 hour.
9. Apply another coat if desired, let fully dry for a couple hours.
10. Spray with sealant. Let sealant set and dry overnight.
11. Make vinyl lettering with Cricut or other cutting machine and attach to sign.
12. Make bow out of your wired-edge ribbon.
13. Attach the bow with strong adhesive like E6000. Hold it in place for a few minutes while the adhesive starts to set. Let fully dry overnight before hanging up.
